

Special Offer: Micromar 40 EWR

Digital Micrometer with data output

The digital micrometer Micromar 40 EWR stands out for its user-friendly operation and wide variety of interfaces. Practical functions, such as the tolerance function with warning limits and the keyboard lock, offer optimal support for a safe and efficient part inspection. The large, high-contrast LCD can be read safely and easily. For evaluation and documentation, the measurement results can be exported via the MarConnect interface. With the bidirectional USB data cable DK-U1 (optional) and the free MarCom 5.3 software, not only measurement data but also other parameters, including serial number, date and time, can be transferred and documented.

Top Features:

- Comfortable and reliable export of measurement data via USB or Digimatic data cable (optional accessory)
- Excellent readability thanks to the large, high-contrast display (digit height 11 mm)
- Ready to measure immediately thanks to the "reference" system
